How to cut and fold your passport

Step 1: Cut off the white border (along the ----- line) around your passport.

Step 2: Fold your sheet of paper in half. Fold it again into quarters, and then one more time so that it is folded into eighths.

Step 3: Open your paper so that it is folded in half. Cut halfway across the middle from the fold (along the ----- line). When you open your paper it should have a slit in the middle.

Step 4: Fold your paper lengthwise (along the crease that has the slit). Hold the paper at either end, then push the ends in toward each other. The sections should fold into each other to form an eight-page booklet.
